

## Slitter/Scorer Slit Hex Drive Shaft

Upgrade

### Upgrade Applications

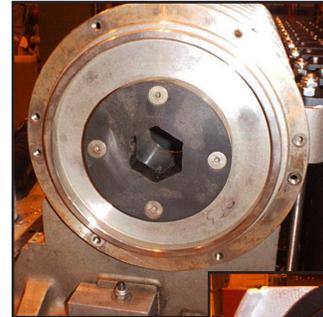

Applies to all Marquip Model I, Model II, and Model III Razorset Slitter/Scorers.

### Upgrade Description

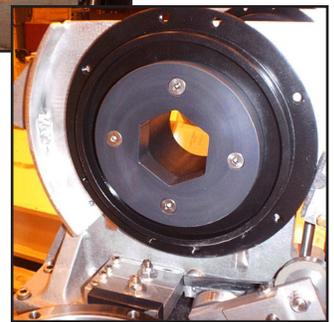

Upgrade of existing slitting hex drive shaft to larger diameter for more robust operation. Includes larger hex drive shaft, new head castings, hubs, tool bearings and linear bearings.

### Upgrade Benefits

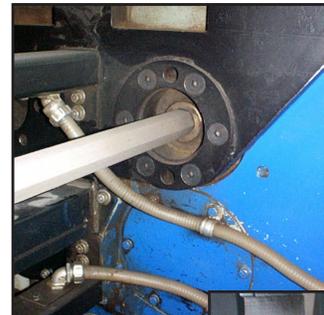

- Increased stability of slit tooling drive system by increasing the outside diameter of the hex drive shaft.
- Allows faster running of one-out and mill run orders.
- Replaces upper slit hex drive shaft, head castings, hubs, tool bearings and linear bearings.
