

## Hawk Sheeter

### Features

- Standardized dual rotary sheeter
- Fixed width 1650 mm (65 in)
- 100% Metric Design
- Incorporates legendary Marquip knife technology
- Great stack quality due to the lateral jogging on stacker
- Easy to operate and easy to maintain
- Superior knife cut quality at all speeds
- Better HMI diagnostics with better remote support options
- Designed with no compromise in quality

# Hawk Sheeter

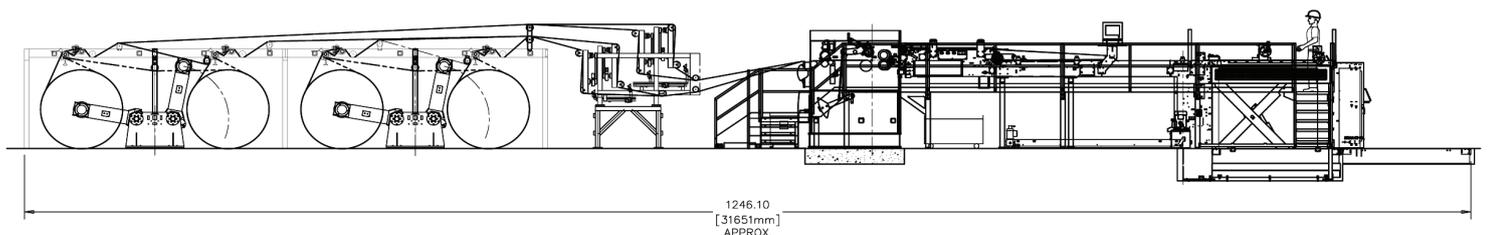

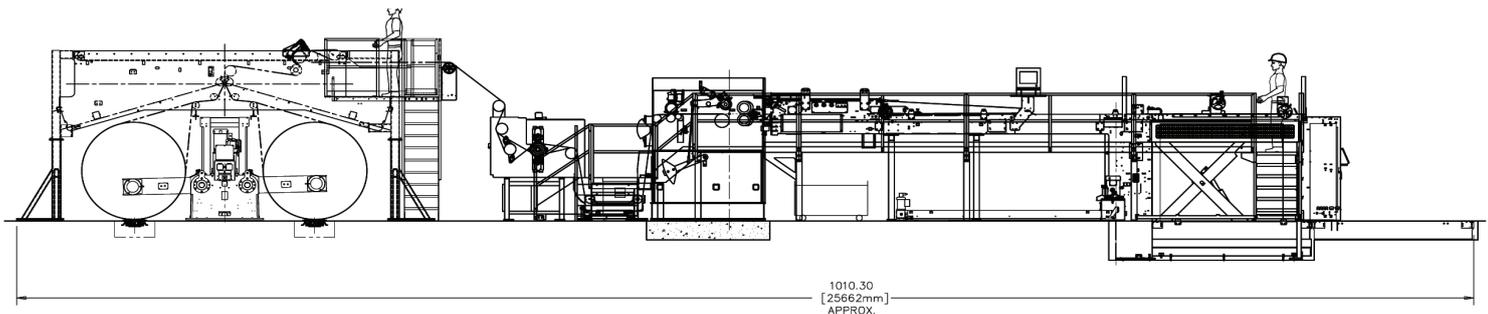

The new Hawk Sheeter from MarquipWardUnited is a medium-sized folio sheeter, designed to meet the needs for the folding carton, small printers, paper merchants and the converting industries.

## Standard Features:

- Low level reel trolleys are installed to allow safe and easy reel loading
- The dual position shaftless unwind loads reels directly from the floor or loading trolley
- The decurler section incorporates 2 or 4 x dual diameter roller decurlers
- A 2 position slitting system
- The most advanced Sheeter knife in the world
- Pulsed airjets at the overlap section provides better reliability at higher running speeds
- The stacker provides side jogging for great stack quality
- Advanced PC based control system. The HMI has intuitive clear functionality and advanced on screen diagnostics

## Optional Features

- A two or four position edge guiding system
- Sensors detect joints in the web and automatically reject them to the waste bin
- Full width dual sided web cleaner
- Reject gate
- Tab inserters
