

Anvil Life Extender

Upgrade

Upgrade Application

Upgrade Application

Applicable to all United and Koppers Rotary Die Cutters.

Upgrade Description

The Anvil Life Extender provides an infinite variation of cutting die to anvil blanket contact. This variation increases anvil life and improves die cut quality. Board crush and cutting die maintenance are reduced as a result of lower cutting pressures.

Upgrade Benefits

- The Anvil Life Extender works in conjunction with the Anvil Oscillator to spread anvil wear evenly over the surface of the blankets.
- Evenly spread anvil wear requires less cutting pressure, resulting in less score cracking and longer anvil life.

Productivity Improvements

- Improved anvil life
- Less frequent anvil rotation
- Higher quality die cuts
- Score cracking
- Improved scrap stripping
- Reduced maintenance costs

Pricing, Installation, and Delivery

Contact your BW Papersystems Regional Product Support Manager or Regional Customer Support Office for pricing and delivery.

Warranty

One year on components.
