New Fixation of Polycarbonate Cards

Machine Model for Improvement: all Kugler-Womako PassPort 1 lines with PC card feeder.

Description of Improvement:

This upgrade is part of the Technical Improvement Program (TIP) and delivers a new module: fixation of polycarbonate cards.

The existing feeder is improved with the additional polycarbonate card fixation module. This ensures the best positioning of the polycarbonate card inside the passport booklet thus minimizing production waste.

All necessary mechanical and electrical adaptations according to the machine configuration are included.

New Fixation of Polycarbonate Cards

Precondition:

- If customer machine is equipped with a flat feeder by roll additional precheck is needed
- Valid for machines with encoder and HMI

Included in this TIP:

- All required parts
- Necessary engineering
- Updated documentation pages for relevant sections

Estimated downtime, no production:

- 3 days

Estimated startup, limited production:

- 0,5 day

Estimated monitoring in production:

- 0,5 day

Required manpower:

- 1 BW Papersystems Field Service Engineer Mechanical for 4 days
- 1 BW Papersystems Field Service Engineer Electrical for 4 days

Installation is not included and will be quoted separately.
