

Singlefacer Preheat Station for Idle Set of Corrugating Rolls

Upgrade

Upgrade Application:

All Automatic Vanguard Singlefacers

Upgrade Description:

Preheat Station for Idle Set of Corrugating Rolls

Includes:

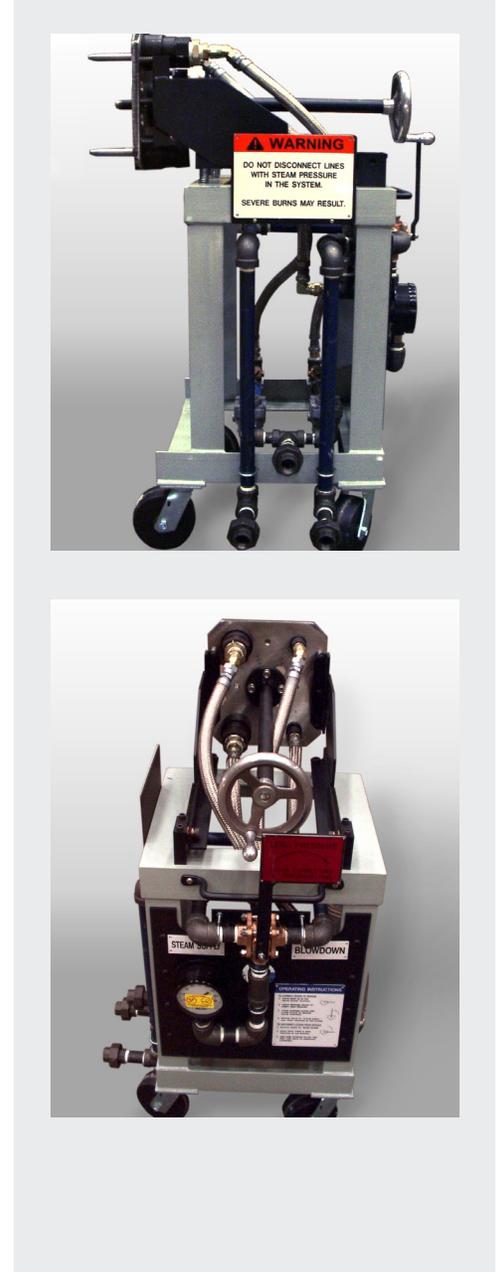

- Hand wheel operated steam coupling plate for safe steam hook up
- Manually operated steam valve to safely supply steam to the rolls and to blow down the rolls prior to disconnecting the steam couplings. Press gauge supplied to monitor steam pressure in rolls
- Strainers and traps built into the cart for steam return

Upgrade Benefits

Preheat Station for Idle Set of Corrugating Rolls raises the temperature of the next roll set prior to roll change to reduce the total changeover time. This can increase plant productivity, reduce downtime and improve production flexibility.
