

Doublefacer AC Motor & Drive

Upgrade

Upgrade Application

Applicable to the main drive for Model 600 and Vacuum Traction Section Doublefacers.

Upgrade Description

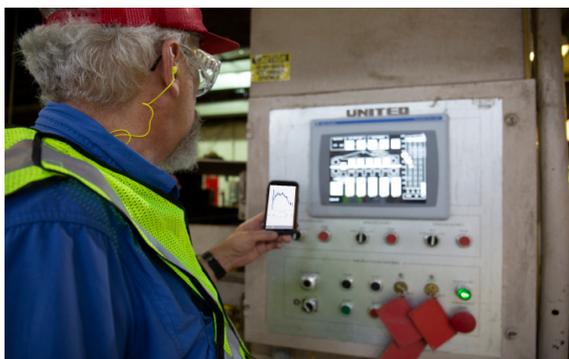

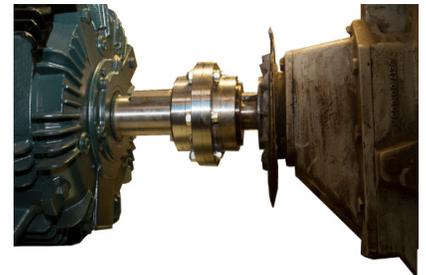

This upgrade replaces the obsolete drive & motor system with a new AC drive & motor system. Includes all necessary engineering, software (when required), new AC drive, AC motor, drive hardware, installation instructions, manual updates, and print updates.

Upgrade Benefits

- Prevents possible downtime due to failed, obsolete components
- OEM (Original Equipment Manufacturer) engineered solution assures software compatibility for smooth installation
- As the OEM, BWP provides upgrades and service specific to your make and model of machine-- this ensures future parts compatibility and troubleshooting
- Efficient AC Motor system
- Helps to prevent possible extended downtime due to failed obsolete components
- Current use Touchscreen for quick delivery
- AC Drive Technology
- Interface to Rockwell Automation Factory Talk Team One

Factory Talk Team One

- Free Rockwell Automation remote monitoring APP
- Ability to monitor drive status remotely
- Use with any connected device
