

Glue Roll 590 + Drive Upgrade

Upgrade

Upgrade Application

Applicable to all Fincorr or Parker/Eurotherm/SSD 5HP to 10HP regenerative and non-regenerative applications.

Upgrade Description

This upgrade provides a current usage drive to replace a now obsolete drive version. Included in this upgrade is the new drive, encoder card, software/program for the drive, prints, manual updates and installation instructions.

Upgrade Benefits

- Prevents possible downtime due to failed, obsolete components.
- OEM (Original Equipment Manufacturer) engineered solution assures software compatibility for smooth installation
- As the OEM, BWP provides upgrades and service specific to your make and model of machine-- this ensures future parts compatibility and troubleshooting
