

Knife Exit Roll Control (ERC)

Upgrade

Upgrade Applications

Applicable to liquid-cooled knives and to some air-cooled knives. Contact Internal Sales for pricing on a specific serial number machine.

Upgrade Benefits

- Improves board control inside the knife
- Minimizes web pulsation
- Eliminates board shear
- Eliminates exit roll slippage and wear
- Improves shingle quality on the stacker, both during normal running and during tail out, as a result of pulling a larger, more consistent gap
- Includes Air Loaded Exit Nip Assembly
