

Knife Lower Cylinder Web Support Rings

Upgrade

Upgrade Applications

Applicable to Model I, II, and III knives.

Upgrade Description

Web support rings attached to the lower cut-off cylinder aid in supporting lightweight board as it travels through the knife. For best results, use in conjunction with Infeed Web Support Pan and Outfeed Web Support Pan upgrades.

Upgrade Benefits

- Reduced frequency of board jams
- Increased runability of lightweight boards

Installation Description

- Measure up for placement of rings
- Tack weld tabs to cylinder
- Fasten rings to tabs

Installation Requirements

As the difficulty range is rated as simple, installation can be performed by customer's plant personnel. A mechanic with welding skills is required.

CAUTION: Before working on machine, perform lock-out procedure per Manual Operation Section.
