

## PLC-5 Remote Upgrade

Upgrade

### Upgrade Description

The Upgrade replaces the obsolete Allen Bradley PLC-5 system.

### Upgrade Features

Includes machine specific engineering, Rockwell PLC system including I/O rack and modules, and power supply.

Includes updated software, updated prints, maintenance and part manual updates.

One Required Per Machine:

- DECC Dry End Remote
- DECC Emulator
- Slitter-Scorer
- Forks
- Knife
- Downstacker (One Required Per Level)

This upgrade requires WinDECC Controls Upgrade with Windows 7.

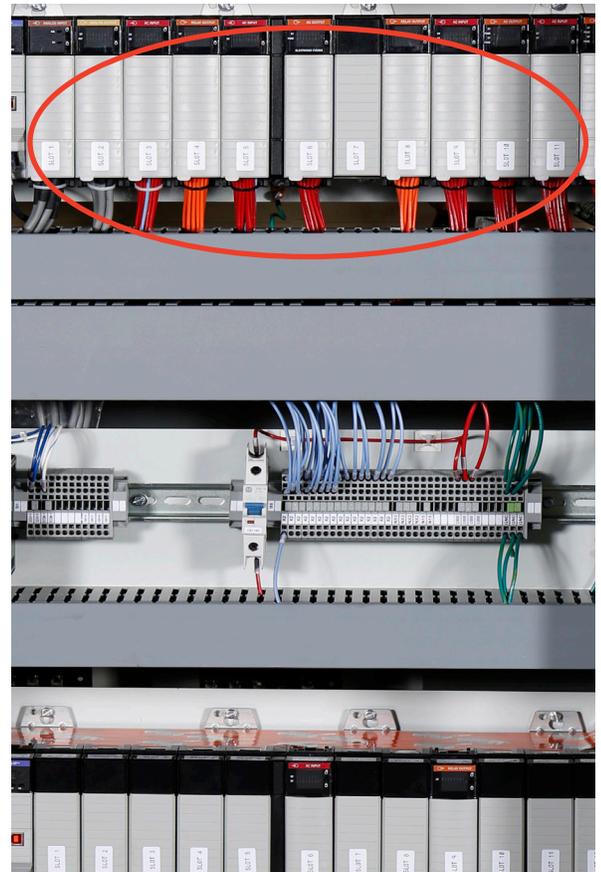

### Upgrade Benefits

Helps to prevent possible extended downtime due to failed obsolete components. Includes Internet Access and Connectivity for Remote PLC Troubleshooting Assistance.

NOTE: Only applies to DECC's with the WinDECC controls upgrade.

NOTE: If DECC has an Emulator PLC-5, must upgrade both.
