

## Slitter/Scorer Lower Anvil Roller Stand

Upgrade

### Upgrade Application

Applicable to Model I, Model II, and Model III slitter/scorers employing Razorset blades with 6 inch spacing between heads. ( Wider spacing bumper available.)

### Upgrade Description

The upgrade includes a new anvil roll stand, which allows for re-positioning of rollers downstream as the blade diameter decreases. Available as stand only ( using existing roller ) or as complete unit ( roller and stand)

### Upgrade Benefits

- Increases blade life

### Upgrade Installation

- Unbolt anvil from linear bearing and install adjustable anvil
- Install roller assembly
- Verify head bumper for correct spacing
- Align anvil with tooling
