

Slitter/Scorer Razorset Quick Change Blade System

Upgrade

Upgrade Applications

Applicable to Model I or Model II knives with Razorset blades.

Upgrade Description

The Razorset Quick Change Blade System includes:

- New 8-bolt blade support ring
- Air-ratchet wrench with Allen bit
- Air line recoil and hose
- New tooling head bolts
- New "swing-away" non-drive-side cover plate
- T-bar wrench to remove the hex shaft nut
- Instructions to modify the holddown roll assembly for fast, simple disassembly

Upgrade Benefits

Fast and simple blade changes reduce the maintenance costs of the slitter/scorer and increase the productivity of the corrugator. The upgrade provides a safer method for blade changes while reducing Razorset blade change time by up to 50%.
