

## Stacker Lift Infeed Holddown Brushes

Upgrade

### Upgrade Applications

Applicable to all Stacker models I, II, and III.

### Upgrade Description

MarquipWardUnited's Stacker Lift Infeed Holddown Brushes upgrade is clearly superior to the pigeon trap finger assembly. The brush-type holddown assembly provides enhanced stack quality through increased control of the board as it enters the stacker lift bay.

### Upgrade Features

- Brush-type holddown assembly
- Applicable to all Stacker models
- Eliminates bent pigeon fingers
- Easy installation
- Improved stack quality
- Reduced maintenance
- Superior board control as it enters the stacker lift bay
