Drive/PLC Upgrade

Machine Model for Improvement: All Zerand Cutter Lines

Description of Improvement:

This improvement can be applied to the control systems of any existing line of equipment. The existing functions can be upgraded as is or can be upgraded to replace mechanical drive trains and install servo motors and higher performance controls. The features and functions that will be available are dependant on the scope of the control system upgrade. This improvement may include new unit HMI's and a new main console computer as well. Each system will be evaluated on a case by case basis with input on the scope required by the custome

Drive/PLC Upgrade
